
Objective

A Senior Data Analytics Consultant with a keen focus on Data Analytics principles, committed to **delivering actionable insights** through analytical functions and **advanced data exploration** methodologies and supporting businesses by crafting progressive strategic initiatives. Proficient in conducting thorough data analysis, adept at **data modeling and transformation**, and serving as a trusted advisor in **decision-making processes**.

SKILLS

- **Languages:** SQL, Python
 - **Frameworks:** Pandas, Numpy, Matplotlib
 - **Tools:** Power BI, Excel, PowerPoint, MySQL, SSIS, SSMS, Tableau
 - **Cloud Tech:** Snowflake, Azure
 - **Platforms:** Jupyter Notebook, Visual Studio Code
-

PROFILE SUMMARY

- 7+ years of experience, including 3 years specializing in data analysis, dashboard development, report creation, and user training. Proven expertise in understanding business requirements and translating them into effective data-driven solutions.
 - 3+ years of hands-on experience in **Power BI (Desktop & Service)**, with a strong command of **DAX** functions.
 - Proficient in creating diverse visualizations like **Table, Matrix, Bar, Card, Line Chart, Map, Tree Map, Slicers, KPIs, and Trend visualizations**.
 - Skilled in developing **calculated columns, measures**, and complex DAX expressions, such as filters and aggregations.
 - Expertise in **Row-Level Security (RLS)**, implementing both Static and Dynamic RLS to control data access for different users.
 - Experience in **sharing reports with external users** through the Power BI Service and **Power BI Apps**, ensuring secure and efficient distribution of insights.
 - Strong knowledge of **Power Query** for data transformation and **ETL** operations, including merge, append, pivot/unpivot, replace errors, remove errors, and handling missing values.
 - Good problem-solving skills, with the ability to logically break down and solve **complex business requirements**.
 - Experience with **scheduling automatic refreshes** and managing data updates through Power BI Service.
 - Expertise in **end-to-end report development**, including creating and deploying dynamic, interactive Power BI reports and dashboards.
 - Experience in working with **multiple data sources** and designing Power BI architecture.
 - Proficient in **SQL Server** and managing data transformations in the **Power BI Query Editor**.
 - Adept at **SDLC** methodologies and delivering user-focused solutions through iterative presentations and feedback sessions.
 - Experience with **automating report refreshes**, setting up workspaces, and leveraging advance Power BI features like **bookmarks, sync slicers and custom visualizations**.
-

WORK EXPERIENCE

SENIOR CONSULTANT (DATA ANALYTICS) | DATAASTRAA LLP

June 24 - Present

- Responsible for the end-to-end **development lifecycle of dashboards**, encompassing **requirements gathering** through client approval.
- Developed dashboards specializing in Finance and contributed to **Sales Analytics, SCM and procurement, and HR Analytics projects**.
- Collaborating closely with clients to anticipate **project needs, scheduling tasks, and providing training to team members**.

DATA ANALYTICS AND AUTOMATION CONSULTANT | LOGIC PURSUITS

April 23 – May 24

- Worked on multiple projects focused on Marketing Analytics database migration testing, and Data Modelling, Business Dashboard Creation while supporting service requests from clients and Involved in Exploratory Data Analysis.
- Created a combination of **200+ SQL scripts**, stored procedures, views, CTE, and nested CTE/queries to clean and transform the data as required, thereby creating the logic to create new parameters and datasets for dashboards
- Created a multiple **Power BI dashboard** from which one was created to address duplicate vendor payments, leveraging unique invoice numbers. Detected **\$15M in duplicate payments**, enhancing financial accuracy.
- Communicated analytical insights through analysis, synthesis and packaging of results (including PPT slides, charts, spreadsheets & Dashboards). Also provided KT sessions to clients/team.

SENIOR PROJECT COORDINATOR | TUV INDIA PVT. LTD

November 19 - March 23

- Provided high-quality inspection services to both domestic and foreign clients while keeping track of all activities through the use of interactive charts, **dashboards**, conditional formatting, **V-Lookup**, filtering, and sorting in **Microsoft Excel**. Inspections were scheduled on time, with clear communication, and ahead of project deadlines.
- Created a dashboard of inspection schedule analysis to determine delays and reasons of customer complaints about inspection services so that management could make necessary decisions. on resource planning, training, and customer satisfaction

- Worked with Product Data Management team to complete daily assigned work as per the client requirement.
- Worked on HVAC Products Data Enrichment project in that the mechanical engineers were required to complete the job.
- Part of Data Quality Team to check and validate work of the data enrichment team before submitting to client.

PROJECTS

Sales Analytics (Power BI, PostgreSQL and SharePoint) | [LINK](#)

- Developed a Power BI dashboard with four pages, enabling stakeholders to track sales distribution by business line, customer, product, and year-month.
- Designed a Revenue Variance Report with drill-down capabilities and conditional formatting to highlight year-over-year growth (green), decline (red), and neutral (yellow).
- Implemented dynamic Pareto analysis allowing users to input custom criteria to identify customers contributing to 80% of sales.

Procurement (Purchase) Analytics (Power BI, PostgreSQL and SharePoint) | [LINK](#)

- Created a Power BI dashboard with an Overview page to analyze purchase distribution by customer, buyer, product, and region.
- Developed Revenue Variance Report for year, month, and quarter comparisons, along with Supplier and Product Comparisons to evaluate purchase patterns and rates across different suppliers.
- Implemented self-analysis and Pareto analysis to provide insights into supplier efficiency and key drivers of purchase spend.

Airline Passenger Referral Prediction | [LINK](#)

- Developed NLP model to extract sentiment analysis from customer reviews through Logistic Regression, Random Forest and Gradient Boosting
- Performed Text Pre-Processing using (NLTK, Tokenization, Lemmatization, TF-IDF Vectorizer) and removed stop words to reduce the dimensionality after TF-IDF.
- Evaluated Model Using Hyperparameter Tuning on all the models and experimentally found Logistic Regression as the best mode using performance metrics with Evaluation Metrics Accuracy 92% and ROC_AUC Score 92.25%.

EDUCATION

Bachelor of Mechanical Engineering

Mechanical Engineering: Percentage: 75 %

Solapur, India

June 13 - May 17

Higher Secondary Education
